NUCLEAR POWER IS NOT THE ANSWER

Please stay on track to decommission the Diablo Valley nuclear plant. Rather than being a solution to California's energy future, keeping the old plant in use constitutes a danger of staggering proportions. When science and engineering come up with a viable and safe plan to dispose of spent fuel rods, and when the operation of nuclear facilities is foolproof, we can reconsider nuclear. That may never happen; radioactivity has a nasty way of lingering on. And on.

Plan for the longterm health and wellbeing of our beautiful state, its people and its nonvoting plants and animals. Thank you,
Susan Crosby
Lifelong Californian
