## **Shut down Diablo Canyon**

Nuclear is a dangerous source of power, especially in earthquakes, war, accidents, and hot weather. Spreading radioactive power is a catastrophe (see Chornobyl and Fukushima)! Not stabilizing the grid, Diablo Canyon reduces the power available during peak times because system operators need to reserve power sources in case the facility has to shut down. It will cost taxpayers and ratepayers BILLIONS to keep Diablo Canyon online. This money must be spent on 21st-century technologies. Our future depends on renewable energies.
