We MUST keep Diablo Canyon Nuclear Power plant open

There is a CLEAR choice: We either keep DCPN open for another 5 to 10 years, or we go backwards and burn more natural gas & coal and turn our backs on CA's climate goals.

Nuclear power is clean reliable power. I live 6 miles as the crow flies from DCPN. I've seen the site and installation. It is immaculate, well-maintained, carefully regulated, updated with new parts when something needs replacing, etc.

KEEP DIABLO CANYON NUCLEAR POWER PLANT OPEN for the next 10 years.
