Diablo Canyon

Hello.

Please take a look at why the extension of this operating license would be a mistake, to benefit only in the short term. it is unanimous at this point that the facility is dangerous and was ill conceived in geography and design.. These points are all agreed upon so it seems that the question which remains are about benefits (sustainability) and overall risk. I ask you to think of 10 to 20 years down the path of energy production. Thank you

Chuck Ziegler
