Please keep your promise to decommission El Diablo

Please stick to the plan. Countless people have worked for many years to make this happen.

The planet is being destroyed.

One accident due to deferred maintenance and/or being allowed to use substandard and short sighted storage procedures by companies such as Edison will be the final nail in the coffin.

The public is being asked to change our way of life in order to preserve the planet. Confidence and trust that our government agencies are sincere in these efforts will be brought into question if promises are not kept.
