OIR-21-03 MIDAS compliance with 1623(b) and 16231(c)

When will MIDAS modifications be completed so it complies with 1623(b) and 1623.1(c)?

As noted in staff's TN242579 Corrected Notice of 15-Day Public Comment Period response, as follows between {}, {section 1623(b) In response to comments that it is not accurate or desirable, staff is proposing to delete, "Each customer shall be able to access all rate information applicable to the customer with a single RIN assigned by the utility." This sentence is inaccurate because a customer should have more than one RIN if they have multiple meters or multiple sites.}, the desired result is to be obtained by providing only a RIN. Any other input such as, but not limited to, logins and passwords will be unlawful when the regulations become effective.

OIR-21-03 MIDAS compliance with 1623(b) and 1623.1(c)

When will MIDAS modifications be completed so it complies with 1623(b) and 1623.1(c)?

Pursuant to CEC resolution number 22-1012-02, After considering all comments received and staff's responses, and based on the entire record of this proceeding, the CEC hereby adopts the amendments to its Load Management Standards regulations, as set forth in the express terms that were published in the Third Notice of 15-Day Comment Period (Cal. Code of Regs., tit. 20, §§ 1621 and 1623). The CEC takes this action under the authority of, and to implement, interpret, and make specific sections 25132, 25213, 25218(e), and 254023.5 of the Public Resources Code.

Now that the express terms as written have been adopted to become effective April 1, 2023, MIDAS will, if not modified to comply with 1623(b) and 1623.1(c), will be unlawfully requiring more input than a Rate Identification Number (RIN) to get returns information sufficient to enable automated response to marginal grid signals.

Pursuant to 1623(b), The Commission maintains public access to the MIDAS database through an Application Programming Interface (API) that, provided a Rate Identification Number (RIN), returns information sufficient to enable automated response to marginal grid signals including price, emergency events, and greenhouse gas emissions.

Pursuant to 1623.1(c), The Commission maintains public access to the MIDAS database through an Application Programming Interface (API) that, provided a Rate Identification Number (RIN), returns information sufficient to enable automated response to marginal grid signals, such as price, emergency events, and greenhouse gas emissions.

As noted in staff's [TN242579](#) Corrected Notice of 15-Day Public Comment Period response, as follows between {}, {section 1623(b) In response to comments that it is not accurate or desirable, staff is proposing to delete, "Each customer shall be able to access all rate information applicable to the customer with a single RIN assigned by the utility." This sentence is inaccurate because a customer should have more than one RIN if they have multiple meters or multiple sites.}, the desired result is to be obtained by providing only a RIN. Any other input such as, but not limited to, logins and passwords will be unlawful when the regulations become effective.
