Subject: RE: TESLA POWER PLANT

Thank you for the quick response. Yes, please use my e-mail address: briball@attbi.com, which is my home address. The concerns I have regarding this project are:

1. Consistent water availability. Appears this may be a problem.
2. Mitigation of PM10 Impacts. If I understand correctly, the plant would secure emission credits. What exactly does this mean and does it allow the plant to cut corners when it comes to air quality?
3. Haera Wildlife Bank adjacent proposed plant. If for no other reason, this plant should not be built in this area because of the Wildlife reserve location. It's right next to proposed location.
4. Williamson Act clearly states "no power plant development". Doesn't this act mean anything?
5. Measure D...this plant goes against the wishes of the county approved Measure D.

In light of above concerns, it would be wise for this proposed power plant to find another location. Thank you for forwarding my notes to the meeting tomorrow.

Sincerely,

Brian Murphy

Hi Brian:

You've reached Roberta Mendonca, the Energy Commission's Public Adviser. Thanks for your interest in the Tesla siting case currently being considered by the California Energy Commission.

To address your question, all public comments are important. The Energy Commission encourages public participation throughout the entire review process. Since you are unable to attend the meeting on the 19th - you can send your comments to my office (e-mail is fine) and I'll file (docket) your statement. Also, I'll be attending the meeting on the 19th and I'll be happy to make your comments a part of the formal transcript for the meeting.

I'm also going to enroll your e-mail address on the Commission's automated list server for Tesla. You'll receive an e-mail note telling you that notices are available for the project.

I'm taking an "guess" here that you've provided both your home and

DOCKET
01-AFC-21

DATE FEB 18 2002

RECD. FEB 20 2002

business e-mail addresses. I'll enroll you for project notices on the Briball@attbi.com address.

Let me also introduce Priscilla Ross, the Associate Public Adviser, who will also be working on the Tesla case.

I hope this answers your question Brian. You'll need to get your statement to the Public Adviser and we will take it from there.

Night.

Sincerely,
Roberta Mendonca
Public Adviser
