Docket Number: 17-MISC-01

Project Title: California Offshore Renewable Energy

TN Number: 247102

Title: Presentation - CEC Workshop on Assembly Bill 525 Assessing CA Seaports for OSW - October 31, 2022

Description: CEC Workshop on AB 525 Assessing California Seaports for Offshore Wind-Status Update

Offshore wind supply chain and the associated infrastructure required for a completely new serial industry will not magically appear without concerted effort by the public sector. I would like to commend BOEM, CA SLC and CEC for sponsoring this critical study to inform industry stakeholders. As was mentioned during the Q&A, there are no projects without ports.

Matt Trowbridge delivered an excellent presentation today outlining the California Port Strategy Roadmap for Offshore Wind. I am really looking forward to the interim outcomes as well as the final AB 525 Seaport Strategic Plan.

The live presentation included slide 37 of 106 which presented existing ports. The presentation transmitted (TN 247102) missed some information from the TN pg 23 of 47 (slide 22/46). Kindly reissue the presentation to update the missing information.

Identify Port Sites - Existing Ports & Harbors
