## **RPS-2021-01 Tracking renewable energy consumed by a LSE**

RPS-2021-01 Tracking renewable energy consumed by a LSE

How does the CEC verify the amount of renewable energy consumed by a LSE?

How does the CEC track renewable energy consumed by a LSE?

Does the CEC require a LSE to use a WREGIS retirement account for renewable energy consumed by a LSE?

Does the CEC require a LSE to use WREGIS export for renewable energy consumed by a LSE that is claimed for third party certification such as Green-E or LEED?

If a third party does not allow export transfers from WREGIS, does the CEC require a LSE to use a WREGIS reserve account to retain RECs for certification by a third party that requires RECs to be retained?
