CEC-057 (Revised 1/21)

Notice of Availability 2025 Energy Code Hourly Factors and Research Versions of CBECC and CBECC-Res Docket #22-BSTD-01

The California Energy Commission (CEC) held two pre-rulemaking workshops – July 18, 2022 and November 10, 2022 – to engage with the public regarding foundational cost-effectiveness methodologies to support the 2025 Building Energy Efficiency Standards (Energy Code). Following the two public workshops, the CEC is making available a research version of the 2025 California Building Energy Code Compliance (CBECC) software and three sets of hourly factors (Systemwide Life Cycle Cost, Source Energy, and Emissions) established for use analyzing measures for the 2025 Energy Code.

Hourly factors for the 2025 Energy Code are available at <https://www.energy.ca.gov/files/2025-energy-code-hourly-factors>.

The research versions of CBECC 2025 and CBECC-Res 2025 (CBECC for single-family homes) are available at <https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2025-building-energy-efficiency-1>.

These versions are for research purposes only and are not approved for compliance with the Energy Code.
