Support For Fountain Wind Project

This text supports approval and construction of the Fountain Wind Project in Shasta County. An existing wind farm has been operating for a decade in the proximate area of the proposed project. Fire danger reduction, watershed protection, needed renewable energy production, new employment opportunities, tax revenue, significant contribution to non carbon based energy and a significant advance for our area to become a provider of high technology means of industrial application to match existing Maas Energy Co. are some of the reasons to support this well designed, carefully planned project. Your favorable consideration is respectfully requested.
