Lisa,
 Please use the following for the project timelines as it is not likely we will begin construction in April.

Phase I activities are anticipated to begin in ~~April~~ **second quarter** 2023 and take approximately 16-19 months to complete. Phase I's construction workforce would have a peak workforce of 150 per month and an average workforce of approximately 100 per month. Phase II would include construction of Building SVY06. Phase II construction would begin as soon as commercially feasible, likely in late ~~2024~~ and take approximately 16 months to complete for commercial operation **in 2026**, ~~at the beginning of 2025.~~
