Hello,

The proposed rules under 23-HERS-01 will severely affect my career as a young professional in renewables/energy efficient buildings and must not be adopted. Programs like this are an important avenue for young folks of all class backgrounds to enter this industry and grow their careers for the benefit of our State's progress towards our collective climate mitigation goals.

The California Energy Commission must not revoke the HERS Program for Field Verification and Diagnostic Testing without first safeguarding the HERS Program for future code cycles. The Commission's attempt to revoke an entire industry without first identifying what new rules will be adopted in its place is reckless and unlawful.

Regards,

Matt Koester, LEED AP Homes, WELL AP
