While updating the rules and regulations is good for the long term success of the HERS industry. Eliminating the current rules and regulations without having new ones in place makes zero sense

The California Energy Commission must not revoke the HERS Program for Field Verification and Diagnostic Testing without first safeguarding the HERS Program for future code cycles. The Commission's attempt to revoke an entire industry without first identifying what new rules will be adopted in its place is reckless and unlawful. The proposed rules under 23-HERS-01 will put me and my company out of business and must not be adopted

Jim Apostolos
