HERS Raters are often the educators and glue in ensuring quality and energy efficiency for homes and buildings. I am surprised that California is considering this current path of uncertainty for this important and vital part of the building industry, not to mention the ripple effect of so many workers livelihoods.

I hope to gain more insight into the true intentions and goals of the CEC with these changes and the timeline of implementation to understand better and until then I believe that the California Energy Commission must not revoke the HERS Program for Field Verification and Diagnostic Testing without first safeguarding the HERS Program for future code cycles. The Commission's attempt to revoke an entire industry without first identifying what new rules will be adopted in its place is reckless and unlawful. The proposed rules under 23-HERS-01 will put me and my company out of business and must not be adopted.

In addition, I have to add that I pride myself on working in CA as we are the leaders in energy efficiency and in many ways our inspection protocols over the IECC code how does this keep CA the leader?

Best,

CASSANDRA TRESTER
Sr. Account Executive and Consultant - California
