Dear Ms. Lorraine White,

Our team here at GEM are certified CABEC CEA's , California CALGreen and HERS raters. We are professional, responsible and ethical when it comes to full and reasonable implementation of the HERS rules set, policies and procedures.

We look forward to the California Energy Commission reversing its current course. We would like to see a path where our roles as HERS raters are secured while at the same time working to establish a new and better group of rules that best implement testing and verification of key energy features in today's modern building.

Our team is available to be industry vetted, subject matter experts to support the development of a new program that works better and has a greater overall effectiveness.

I am cc our State Senator and Assemblyman. I will be reaching out to them to express our concerns about the rushed nature of this process for no apparent good reason.

Thank you for your time.

Sincerely,  
Kevin
