NEVI Program Update

NEVI Program Background

- 1. Formula funding: \$384M for California over 5 years
- 2. Will support charging stations (EV only) on private sites along 6,600 miles of interstates, US routes, and state routes in California
- 3. At least four fast chargers every 50 miles or less and no more than one mile from corridor
- 4. 50% of chargers must be in Disadvantaged Communities/Low-Income Communities (DAC/LIC) and 40% in Justice40 communities

California's Deployment Plan for the NEVI Program

NEVI Standards and Requirements

- Final minimum standards for federally funded electric vehicle charging infrastructure projects
- Posted on February 28, 2023
- Effective March 30, 2023

Federal Register/Vol. 88, No. 39/Tuesday, February 28, 2023/Rules and Regulations

Federal Highway Administration

23 CFR Part 680 [FHWA Docket No. FHWA-2022-0008] RIN 2125-AG10

National Electric Vehicle Infrastructure Standards and Requirements

AGENCY: Federal Highway
Administration (FHWA), U.S.
Department of Transportation (DOT).
ACTION: Final rule.

SUMMARY: This final rule establishes and requirements for projects funded under the National Electric Vehicle Infrastructure (NEVI) Formula Program and projects for the construction of publicly accessible electric vehicle (EV) chargers under certain statutory uthorities, including any EV charging infrastructure project funded with Federal funds that is treated as a project on a Federal-aid highway. The standards and requirements apply to the installation, operation, or maintenance of EV charging infrastructure; the nteroperability of EV charging infrastructure; traffic control device or on-premises signage acquired, installed or operated in concert with EV charging nfrastructure: data, including the format and schedule for the submissio of such data; network connectivity of EV on publicly available EV charging infrastructure locations, pricing, realtime availability, and accessibility through mapping applications. DATES: This final rule is effective March

FOR FURTHER INFORMATION CONTACT: Mr Gary Jensen, Office of Natural Environment, (202) 366–2048, or via email at Gary,Jenseen@dot,gov, or Ms. Dawn Horan, Office of the Chep of the Counsel (HCC-30), (202) 368–9615, or via email at Dawn.M. Horan@dot,gov. Office hours are from 8 a.m. to 4:30 p.m., E.T., Monday through Friday, except Federal holidays. SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

Electronic Access and Filing

This document, the notice of proposed rulemaking (NPRM), all comments received, and all background material may be viewed online at www.regulations.gov using the docket number listed above. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be

downloaded from the Office of the Federal Register's website at www.federalregister.gov and the Government Publishing Office's website at www.GovInfo.gov.

Executive Summary

This final rule establishes regulations that set minimum standards and requirements for projects funded under the NEVI Formula Program, projects for the construction of publicly accessible EV chargers funded under Title 23, United States Gode (U.S.C.). This also includes any publicly accessible EV charging infrastructure project funded with Federal funds that is treated as a project on a Federal-aid highway.

The FHWA is directed by paragraph (2) under the Highway Infrastructure rogram heading in title VIII of division J of the Bipartisan Infrastructure Law (BIL) (enacted as the Infrastructure nvestment and Jobs Act) (Pub. L. 117-58) (Nov. 15, 2021) to create minin standards and requirements for NEVIunded projects. 135 Stat. 429, 1424. Congress specified that "funds made available under" the NEVI Formula Program are "subject to the minimum standards and requirements." As outlined in statute, the purpose of the NEVI Formula Program is to "provide funding to States to strategically deploy EV charging infrastructure and to establish an interconnected network to facilitate data collection, access, and reliability." This purpose is satisfied by creating a convenient, affordable, reliable, and equitable network of chargers throughout the country. Prior to the establishment of this rule, there were no national standards for the nstallation, operation, or maintena of EV charging stations, and wide disparities exist among EV charging stations in key components, such as operational practices, payment methods display of price to charge, speed and power of chargers, and information communicated about the availability and functioning of each charging station. The FHWA is also directed by Section 11129 of BIL, which amends 23 U.S.C. 109, to ensure that certain EV charging station standards apply to all projects that install EV charging infrastructure using funds provided under Title 23, U.S.C. This final rule does not conflict with or supersede the implementing regulations for other Title 23, U.S.C. statutory requirements. This final rule enables States or other

¹Refer to "DOT Funding and Financing Programs with EV Eligibilities" chart on pages 10–11 in the NEVI Formula Program Guidance, available at https://www.finva.dot.gov/environment/alternative_ feel_corridors/nominations/90d_nevi_formula_ program_guidance.pdf;

designated recipients to implement federally funded charging station projects in a standardized fashion in order to build a convenient, accessible, reliable, and equitable charging network across the country that can be utilized by all EVs regardless of vehicle brand. Such standards provide reliable expectations for travel in an EV across and throughout the United States, regardless of which State you charge in, and support a national workforce skilled and trained in charging station installation and maintenance.

The BIL specifically requires minimum standards and requirement be developed related to at least six

(1) Installation, operation, and maintenance by qualified technicians of EV infrastructure. The FHWA requires installation, operation, and maintenance and technician qualifications of the NEVI Formula Program projects and projects for the construction of publicl accessible EV chargers that are funded under Title 23, U.S.C., including any EV charging infrastructure project funded with Federal funds that is treated as a project on a Federal-aid highway. In erms of standards for installation, operation, and maintenance, chargin stations are required to contain a connectors, payment methods, and requirements for customer support qualifications, there are minimum requirements for training, and certification standards for technician installing, operating, and maintaining chargers to ensure consistency around quality installation and safety across the network. This final rule provides the traveling public with reliable expectations for their EV charging experience anywhere that NEVI Formula funds or Title 23, U.S.C. funds including Federal funds for projects that are treated as a project on a Federal-aid highway, are used to construct EV charging infrastructure. In addition to requirements that are customer-facing, a series of additional requirements provide less visible, vet critical. standardization and uniformity for how charging stations would be installed, maintained, and operated. These types of requirements address topics such as the certification of charging equip security, long-term stewardship, the qualifications of technicians installing and maintaining charging stations, and the privacy of customer data conveyed This final rule also explains what the program income can be used for when there is net income from the sale, use, lease, or lease renewal of real property

NEVI Funding Program Map

NEVI Matchmaking Tool

Purpose of Matchmaking Tool

NEVI Interested Site Host and Partners Sign Up Form

The first National Electric Vehicle Infrastructure (NEVI) Program Funding solicitation is under development and expected to be released in 2023. California Department of Transportation (California and California Energy Commission (CEC) heard from various stakeholders about the need for a matchmaker to connect potential site hosts with potential NEVI project leads.

Interested site hosts and other potential NEVI project partners can submit their contact and other relevant information in this form for the purposes of facilitating partnerships. By filing out this form, you agree to have your contact information and facility location posted **publicly** on the CECs website <u>AND</u> have entities contact you.

Note: Site hosts may be contacted by entities applying for non-NEVI funding.

If you have previously filled out this form and would like to be removed from the list, please submit your request here: https://forms.office.com/g/U0Y1iRbwd8.

CEC makes no guarantees, promises, or representations as to the qualifications of participants in this matchmaking process, nor as to the success of receiving NEVI funds as a result of participation.

CEC assumes no liability whatsoever for any harm to any corporation or individual which may result from participation in this matchmaking process. Survey respondents, by submitting survey, agree to indemnify, defend, and save harmless the State, its officers, agents, and employees from any and all claims and losses accruing to the survey respondent or any other person, firm, or corporation in connection with participating in the matchmaking process.
