Comment Received From: Wei Pan
Submitted On: 4/13/2023
Docket Number: 18-SOLAR-01

SYL Battery Co Ltd

Additional submitted attachment is included below.

Request for Information

1. What Entity, if any, do you represent for are you affiliated with?

I am representing the BESS equipment supplier SYL (Ningbo) Battery Co. Ltd, a subsidiary of the Risen Group. SYL provides BESS, from Commercial and Industrial applications to Utility scale energy storage solutions, to customers all around the world. Company address is:

SYL (Ningbo) Battery Co. Ltd. No. 23 Xingke Zhong Road. Ninghai, Ningbo. China 315609

2. What is your/your organization's primary use of the Solar Equipment Lists?

SYL is often asked by our customers in the US, especially in California, to list our BESS on the CEC. To be listed on the CEC site increases our chance of being accepted by our customers.

3. How often do you download or reference the Solar Equipment Lists from the Solar Equipment Lists website?

Less than 1-time per month.

4. Please provide information on how the Solar Equipment Lists assist you/your organization with everyday business needs:

- i. How do they integrate with your operations?

This list is very useful to our customers that need the BESS product to be part of the list to get approvals from the utility and apply for SGIP.

- ii. How would you describe the value of the lists to your efforts?

This list helps us, as an equipment vendor, to sell products in the state of California.

- iii. If applicable, approximately how many interconnection-applications/permits to operate do you process, on a monthly basis, using the data on the Solar Equipment Lists?

We don't process applications or permits as we are not an EPC company.

5. Roughly how much time do you save on a weekly or monthly basis by using the data on the Solar Equipment Lists, as opposed to not having the lists as a reference?

SYL doesn't have such estimate or calculation. But we were told by our customers that they rely on the lists heavily to start applications and get permits.

6. Is there a format that would improve the effectiveness of the list or ability to use them?

No comments.

7. Can you substitute the data from the Solar Equipment Lists with another data sources? How would your program(s) be impacted without the resources?

We don't know other data sources.

8. As an equipment manufacturer (if applicable), what are the benefits of having your equipment listed on the Solar Equipment Lists?

Being listed on the Solar Equipment Lists makes our products reach more customers in California and other states. It also can save permit processing time for our customers.

9. Please share any other feedback you would like us to consider.

No comments.
