Please make HEEHRA rebates available for upgrades made in 2023

Based on the prevailing information circulated in media sources quoting government agencies and entities, we thought rebates would be available for installing a heat pump system during 2023, so we went ahead and had them installed. The DOE seems to be taking a long time establishing the guidelines... Once guidelines are (finally) established, and the state sets it's own guidelines for the distribution of funds, PLEASE make rebates available to people like us, if eligible, who made the necessary upgrades in 2023! We want to do our part to avert the worst prospects associated with this climate catastrophe, but it's expensive to do so. We hope that help isn't withheld because we acted on the early side. Thanks!
