### **Hope 8,000 rebate is retroactive**

I certainly hope that the \$8,000 rebate will be made available to those of us who installed heat pumps in 2023. We wanted to get one and replace our aging furnace as soon as possible so to find out we should have waited and used the gas for another year in order to make the cost more manageable (we used almost all of our savings to pay for it...) seems inappropriate and unfair, and defeats the purpose of the legislation.

Thank you.
