Dear Paul,

As you are aware, ConnectGen recently submitted an Opt-in Application for Certification to the California Energy Commission for the Fountain Wind Project. As part of our data deficiency review, we received a number of requests from the CEC for additional information regarding land use and cumulative projects. Specifically, the CEC requests the following:

- “local and regional planning projections for Shasta County”
- “foreseeable future development of small wind energy systems as a result of 2022 amendments to the Shasta County Code”
- “updated cumulative projects list that includes planned/proposed or permitted projects since August 2019”

Our preliminary research online and via Shasta County's website has resulted in very little information on these topics, and we would greatly appreciate any details the Planning Division could provide to us to submit to the CEC. If needed, I would be happy to set up a file transfer site to accommodate large files. Please let me know.

Best,
Caitlin
