10:00 a.m. – 12:00 p.m.

See Attendance Instructions

The California Energy Commission (CEC) will jointly conduct a staff workshop with the California Public Utilities Commission (CPUC) and the California Independent System Operator (CAISO) to discuss resource portfolio assumptions for use by CAISO in the next 20-Year Transmission Outlook.

The public can participate in the staff workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is an estimate based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

The workshop will include presentations from CEC, CPUC, and CAISO staff on resource portfolio assumptions for use by CAISO in the next 20-Year Transmission Outlook. The workshop will include time for questions and public comment.

A detailed meeting schedule and workshop materials will be posted prior to the workshop at [Docket No. 21-SIT-01](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-SIT-01), at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-SIT-01>.

Background

The 100 Percent Clean Energy Act of 2018 (SB 100, De León, Chapter 312, Statutes of 2018) establishes a target for renewable and zero-carbon resources to supply 100 percent of retail sales and electricity procured to serve all state agencies by 2045. SB 100 requires the CEC, CPUC, and

California Air Resources Board to develop and submit a joint-agency report to the legislature by January 1, 2021, and at least every four years thereafter. The first [SB 100 Joint Agency Report](https://www.energy.ca.gov/sb100) (<https://www.energy.ca.gov/sb100>) was published in March 2021.

To build-off the 2021 SB 100 Joint Agency Report, the CEC, the CPUC, and the CAISO collaborated on an approach to translate the analyses conducted for the report into an [SB 100 Starting Point Scenario](https://efiling.energy.ca.gov/GetDocument.aspx?tn=239685&DocumentContentId=73101) (<https://efiling.energy.ca.gov/GetDocument.aspx?tn=239685&DocumentContentId=73101>) for use by the CAISO in the 20-Year Transmission Outlook.

The objective of CAISO's 20-year outlook is to explore longer term grid requirements and options for meeting the state's greenhouse gas reduction goals. The first [20-Year Transmission Outlook](https://stakeholdercenter.caiso.com/RecurringStakeholderProcesses/20-Year-transmission-outlook) (<https://stakeholdercenter.caiso.com/RecurringStakeholderProcesses/20-Year-transmission-outlook>) was released in May 2022, and the next 20-Year Transmission Outlook is anticipated in 2024.
