Level 2 EVSE Technology Requirements Update

Additional submitted attachment is included below.

COMMUNITIES IN CHARGE

EVSE Technological Requirement Updates

In coordination with the California Energy Commission, Communities in Charge announces the following technology requirement updates for Level 2 EVSEs. These changes shall not supersede existing requirements outlined in the Implementation Manual under Section 2.4.2.

Requirement	Technology	Date
OCPP 1.6 or later Core (Subset) & Security certifications, * or OCPP 2.0.1 certification proof of payment, or OCPP 2.0.1 test tool report showing compliance for Core & Security	L2	January 1, 2024
OCPP 2.0.1 Core & Security certification*	L2	January 1, 2025
ISO 15118 Hardware Ready	L2	July 1, 2024

* EVSE models must be certified to be eligible for block grant funding. There are no current requirements for certification of software used by the charging station management system.
^ Manufacturers which enroll OCPP 1.6 certified equipment on or before January 1, 2024, may request an extended July 1, 2025, certification deadline for OCPP 2.0.1
