21-ESR-01 SB 846 Diablo Canyon Power Plant Cost Analysis

Do not grant an extension to the operation of Diablo Canyon nuclear power plant. This is the wrong direction in energy policy, actually interfering with the transition to clean and safe alternatives. The plant is old and dangerous, located near multiple earthquake faults. It should be shut down on schedule! God forbid it continues unsafe operations and an accident occurs, threatening the lives of tens of thousands. Their lives are in your hands and on your conscience!
