## **Fuel cell is a big lie**

I own a mirai and it has become too much problems of fueling the vehicle even with a station 6 miles down the road. Long lines and only 1 pump available with only this station operational in the sacramento area. It is my belief that we were not told the whole truth by the dealer that sold us the car and the industry that has us to believe in hydrogen. I plan on getting rid of my hydrogen vehicle soon and going back to a gas vehicle that is so so much easier to fill up. For the future buyers of hydrogen power vehicles, please tell the truth about fuel supply and fueling issues. This should be up front!!!!
