**Green H2 % Cost and Availability (First Element Fuel)**

*Additional submitted attachment is included below.*

A question for First Element Fuel.

You currently state you are 100% green on H2 sources.

If you backed down to 66% (as required by your grants), could you ...

- \* See an easing of costs/pricing
- \* See an easing of supply disruptions

This may only be an interim issue, pending low carbon fuel credit increases, which are hopefully next year.

Doug Dumitru
