## **stop the fountain wind project**

Please stop this project. We have been thru enough fighting this to have it over turned. We have lost homes thru the fountain fire(political fire) We should not have to put our homes at risk since planes will not be able to fight fires with the windmills there.

No more back door deals and risk lives for monetary gain

Subject: Opposition to the Fountain Wind Project in Shasta County

Dear Mr. Payne and members of the California Energy Commission,

I am writing to express my strong opposition to the proposed Fountain Wind Project in Shasta County, California. As a concerned resident of California, I believe that this project poses significant environmental, social, and economic risks that must be carefully considered and addressed.

The significant impact on wildfire safety,(It has been difficult enough for our fire fighters to fight fires in our area especially aerial firefighting. We burned once in a political fire (fountain fire) They Jeopardize Tribal lands, local wildlife, habitat disruption, noise/light pollution, visual aesthetics, etc. Our mountainous roads can't handle the construction traffic alone.

I urge the California Energy Commission to conduct a thorough and transparent review of the Fountain Wind Project, considering the potential consequences it may have on the community and environment. It is essential that all relevant stakeholders, including local residents, are given the opportunity to voice their concerns and have their input taken into account during the decision-making process, especially considering that Shasta County has twice rejected this project already.

Thank you for your attention to this matter. I trust that the California Energy Commission will carefully evaluate the concerns and objections of the residents of Shasta County before making any decisions regarding the Fountain Wind Project.

Sincerely,

Patricia Taylor
