There are other less obtrusive ways to generate more electrical power

These windmills are a huge scar upon the land, an eyesore! The burden on the existing infrastructures is extensive and our quality of life will be negatively impacted, with no significant benefit to our quality of life. I am for the new technology in the nuclear power field to power our future energy needs. Tax and hold responsible those enterprises that sell us energy (electricity) consuming products, they should be held to a high standard of being responsible for finding energy solutions for powering the products they sell. To that end putting these energy producing monstrosities in our pristine environments is not acceptable. Don't let the "money power" continue to make bad environmental and consequential bad political decisions for you.
