

**DOCKETED**

<b>Docket Number:</b>	23-OIIP-01
<b>Project Title:</b>	Order Instituting Informational Proceeding on Maximum Gross Gasoline Refining Margin and Penalty
<b>TN #:</b>	253346
<b>Document Title:</b>	November 28th Workshop Presentation
<b>Description:</b>	N/A
<b>Filer:</b>	Donnie Cox
<b>Organization:</b>	California Energy Commission
<b>Submitter Role:</b>	Commission Staff
<b>Submission Date:</b>	11/28/2023 10:04:38 AM
<b>Docketed Date:</b>	11/28/2023

# California Energy Commission

SB X1-2 Workshop: Refining Margin Establishment and Penalty Determination

November 28, 2023

# Agenda

---

- Welcome and Overview - Drew Bohan
- Opening Remarks from Dais
- Economics Presentation - Matthew Zaragoza-Watkins, Vanderbilt University
  - Questions/comments from the Dais
- Roundtable Discussion: Impacts and Benefits of Implementing a Max Margin and Penalty
  - Questions/comments from the Dais
- Public Comment
- Closing Remarks from Dais

# SB X1-2 Implementation Activities

Governor signed on March 28, 2023

Data Collection,  
Monitoring & Reporting  
(started on June 26)

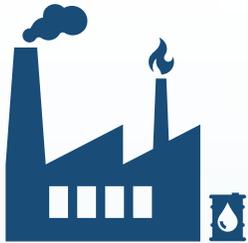

Transportation Fuels  
Assessment

Fuels Transition Plan  
(in development with  
CARB)

## Today's Topic

Refinery Maintenance  
Monitoring  
(started on June 26)

**Refining Margin  
Establishment and  
Penalty Determination  
(in progress)**

Market Manipulation Analysis  
(to be developed under DPMO)

# SB X1-2 Margin and Penalty Timeline

SB X1-2 signed by  
Governor  
March 28, 2023

OIIP approved at  
business meeting  
October 18, 2023

Penalty  
framework  
workshop  
Q1 2024

Data collection started  
June 26, 2023

OIIP kickoff  
workshop  
November  
28, 2023

Staff  
Recommendation  
on Penalty  
Late 2024

# Purpose of Margin Cap and Penalty

SB X1-2 (sec 1) states:

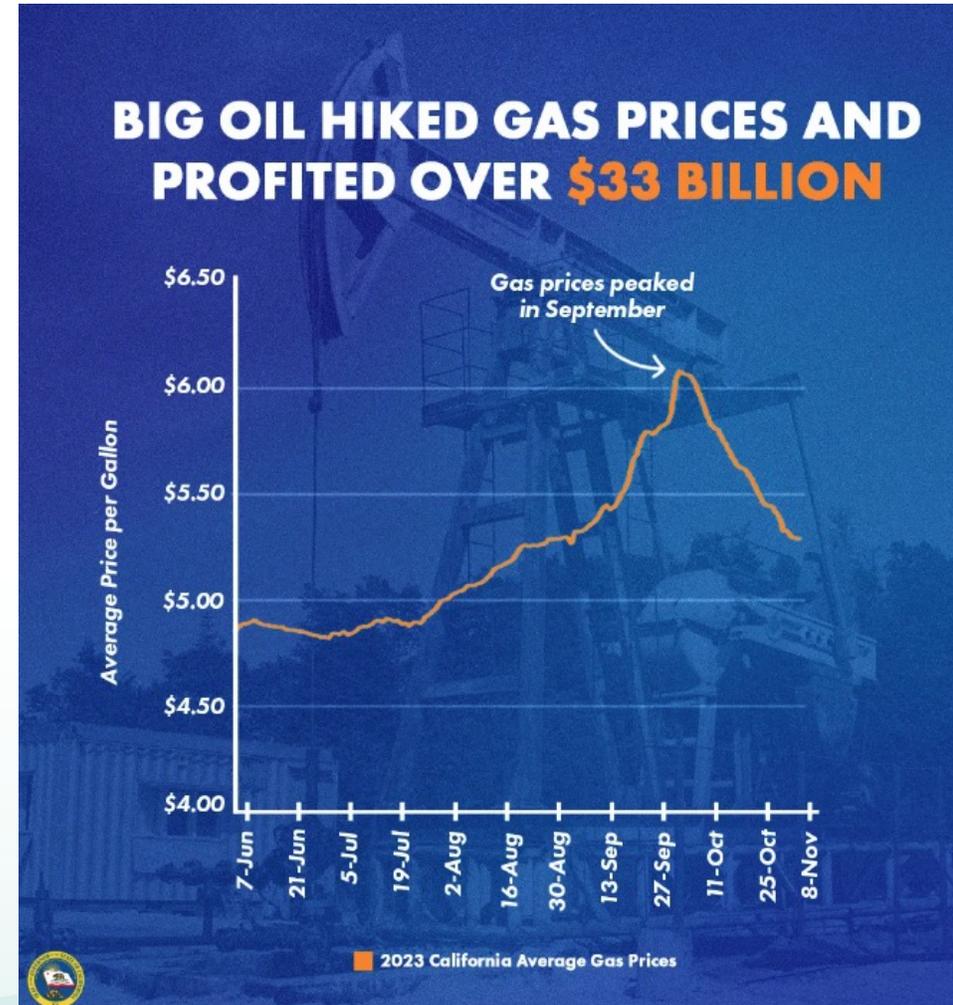

- (g) Although preventable capacity limitations and inventory shortages played a role in the third quarter of 2022 price increases, they cannot account for all of those increases . . .
- (h) Indeed, during a 90-day period in 2022, refiners earned a record \$63,000,000,000 in profits . . .
- (i) Fundamental change is necessary to prevent future extreme price spikes and price gouging by oil companies . . .

# Oil Company Profits

Here's how much oil companies profited as gas prices spiked in Q3 2023:

Valero	\$2.6 billion
Phillips 66	\$2.1 billion
Marathon	\$3.28 billion
PBF Energy	\$786 million
BP	\$3.3 billion
Exxon	\$9.1 billion
Chevron	\$6.5 billion
Shell	\$6.2 billion

# Refining Margin Establishment

(PRC 25355.5)

To impose a penalty, SB X1-2 states the CEC must:

- Determine consumer benefits exceed costs
- Consider the impact of a penalty on:
  - Supply/demand challenges
  - Average prices at the pump
  - Other factors: What else should the CEC consider?

# Potential Options for Framing Penalty

## Structural Inefficiencies

- Structural inefficiencies leading to high prices at the pump
- Penalty as a tool to reduce impact on customers

## Exploitation of Structural Inefficiencies

- Deliberate exploitation of structural inefficiencies
- Penalty as a deterrent or incentive to increase supply

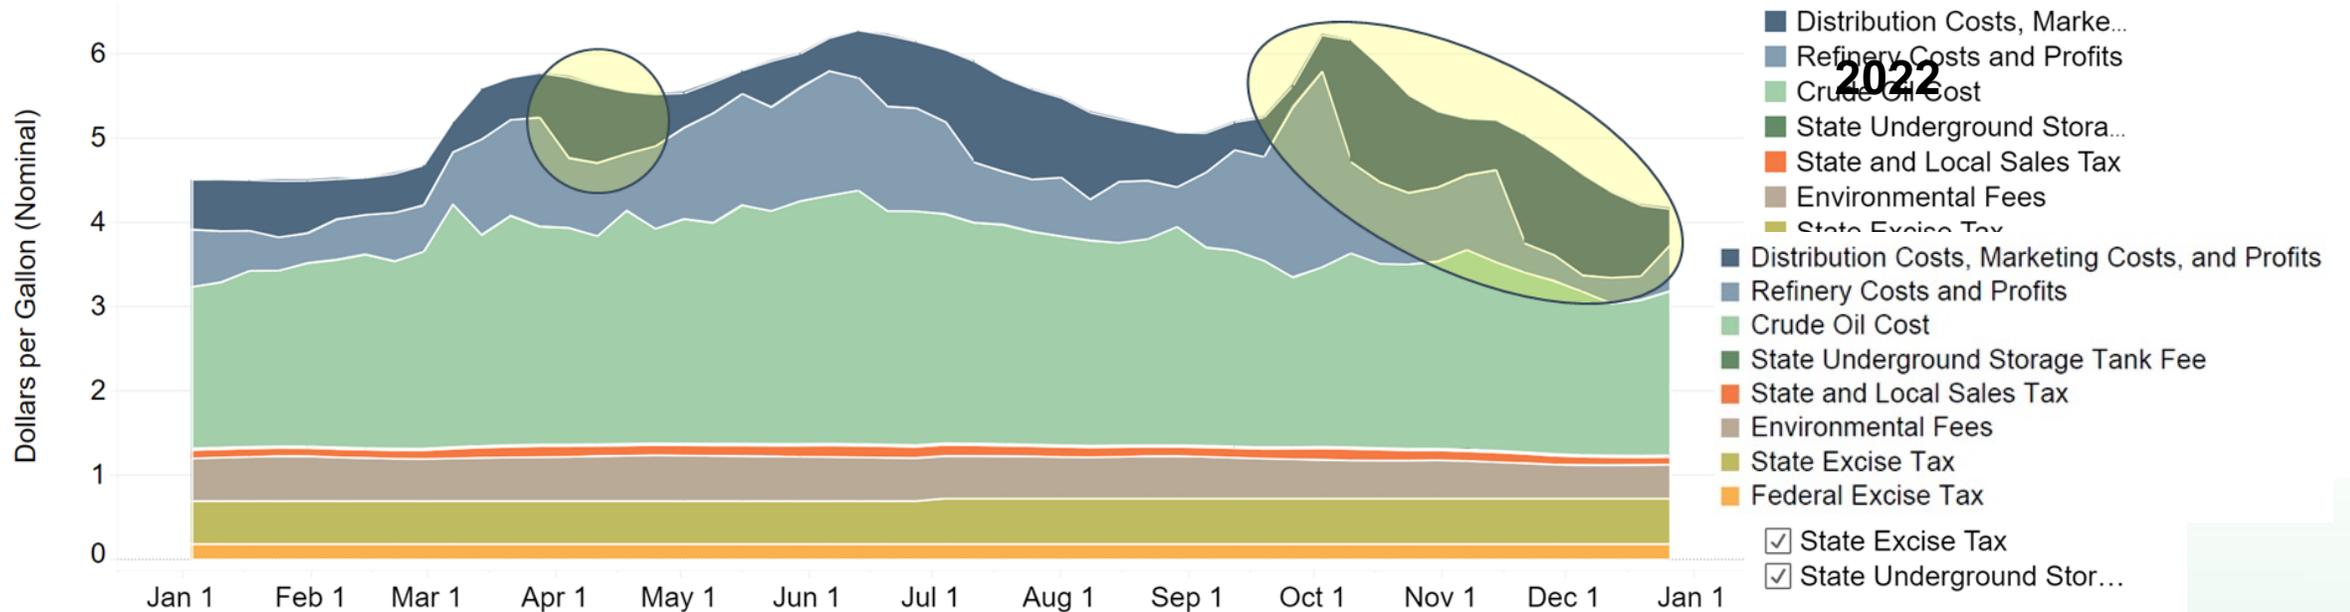

## Other issues...

# Gross Gasoline Refining Margin

Refiner Margin = Rack Price – Crude Oil Cost – Environmental Cost

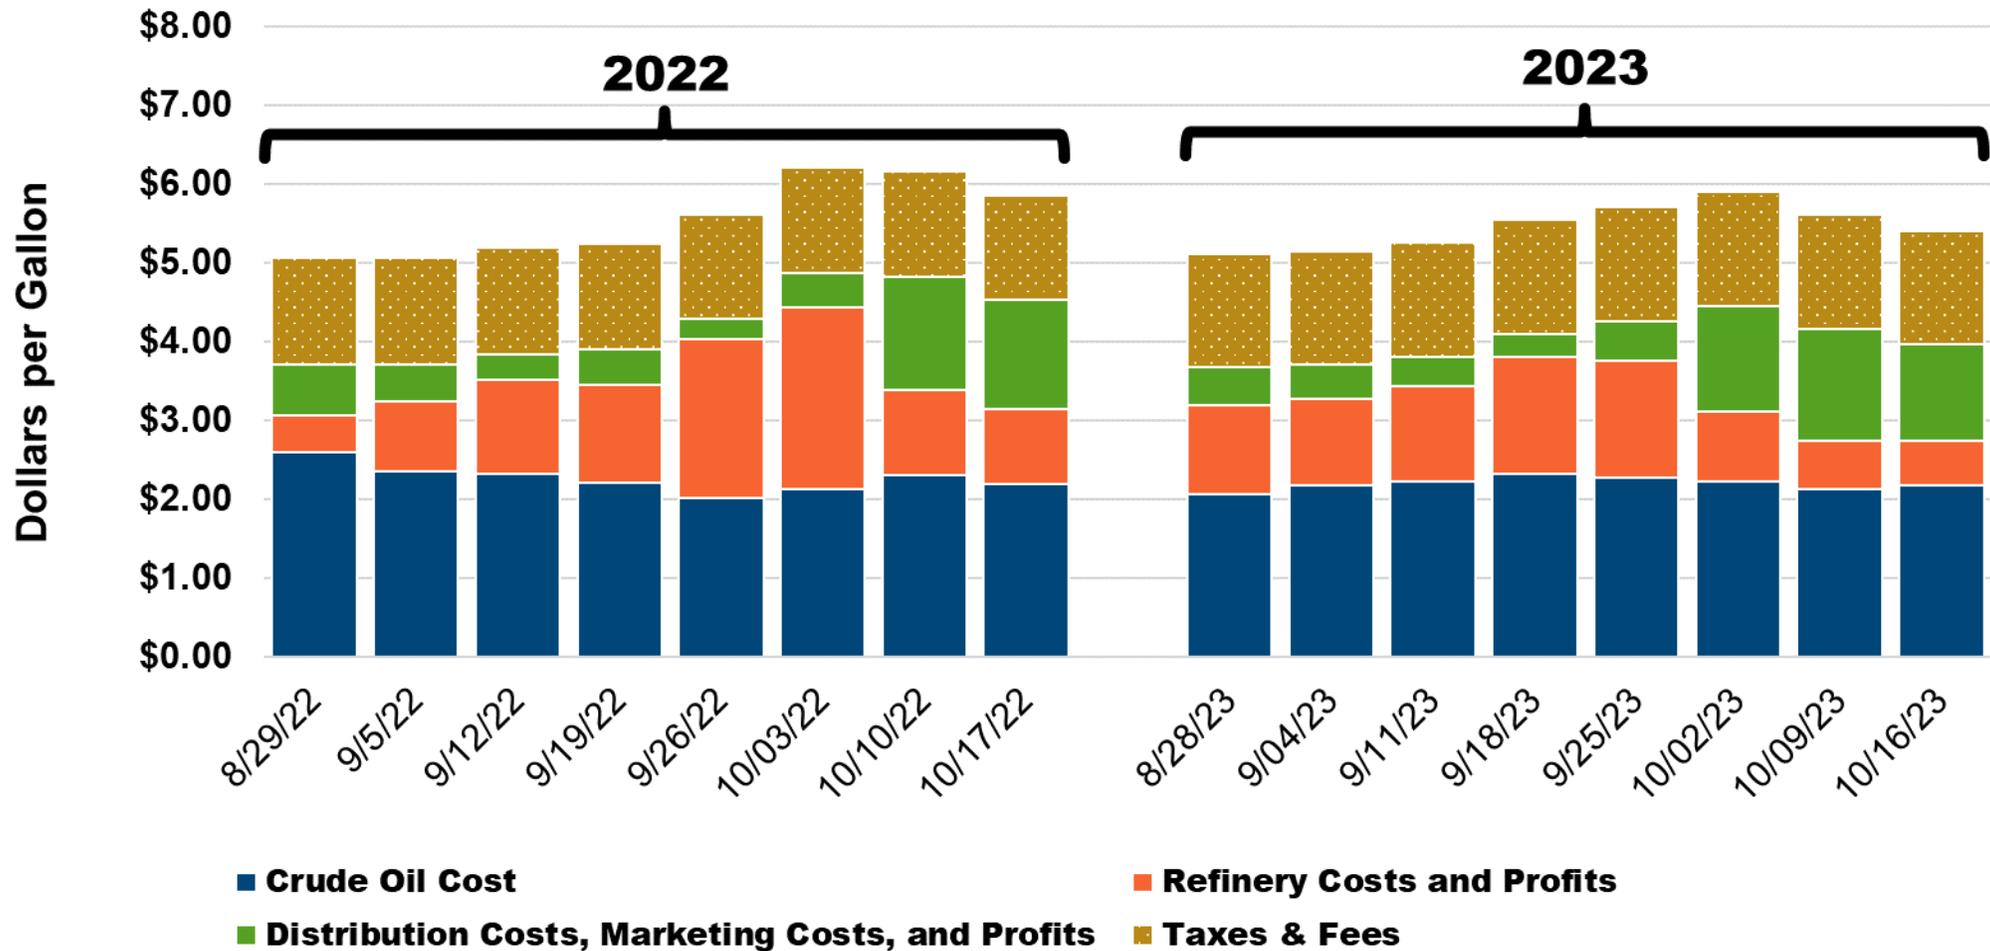

## California Gasoline Price Breakdown and Margins

Source: CEC analysis of OPIS, CDTFA, and Alaska Department of Revenue data

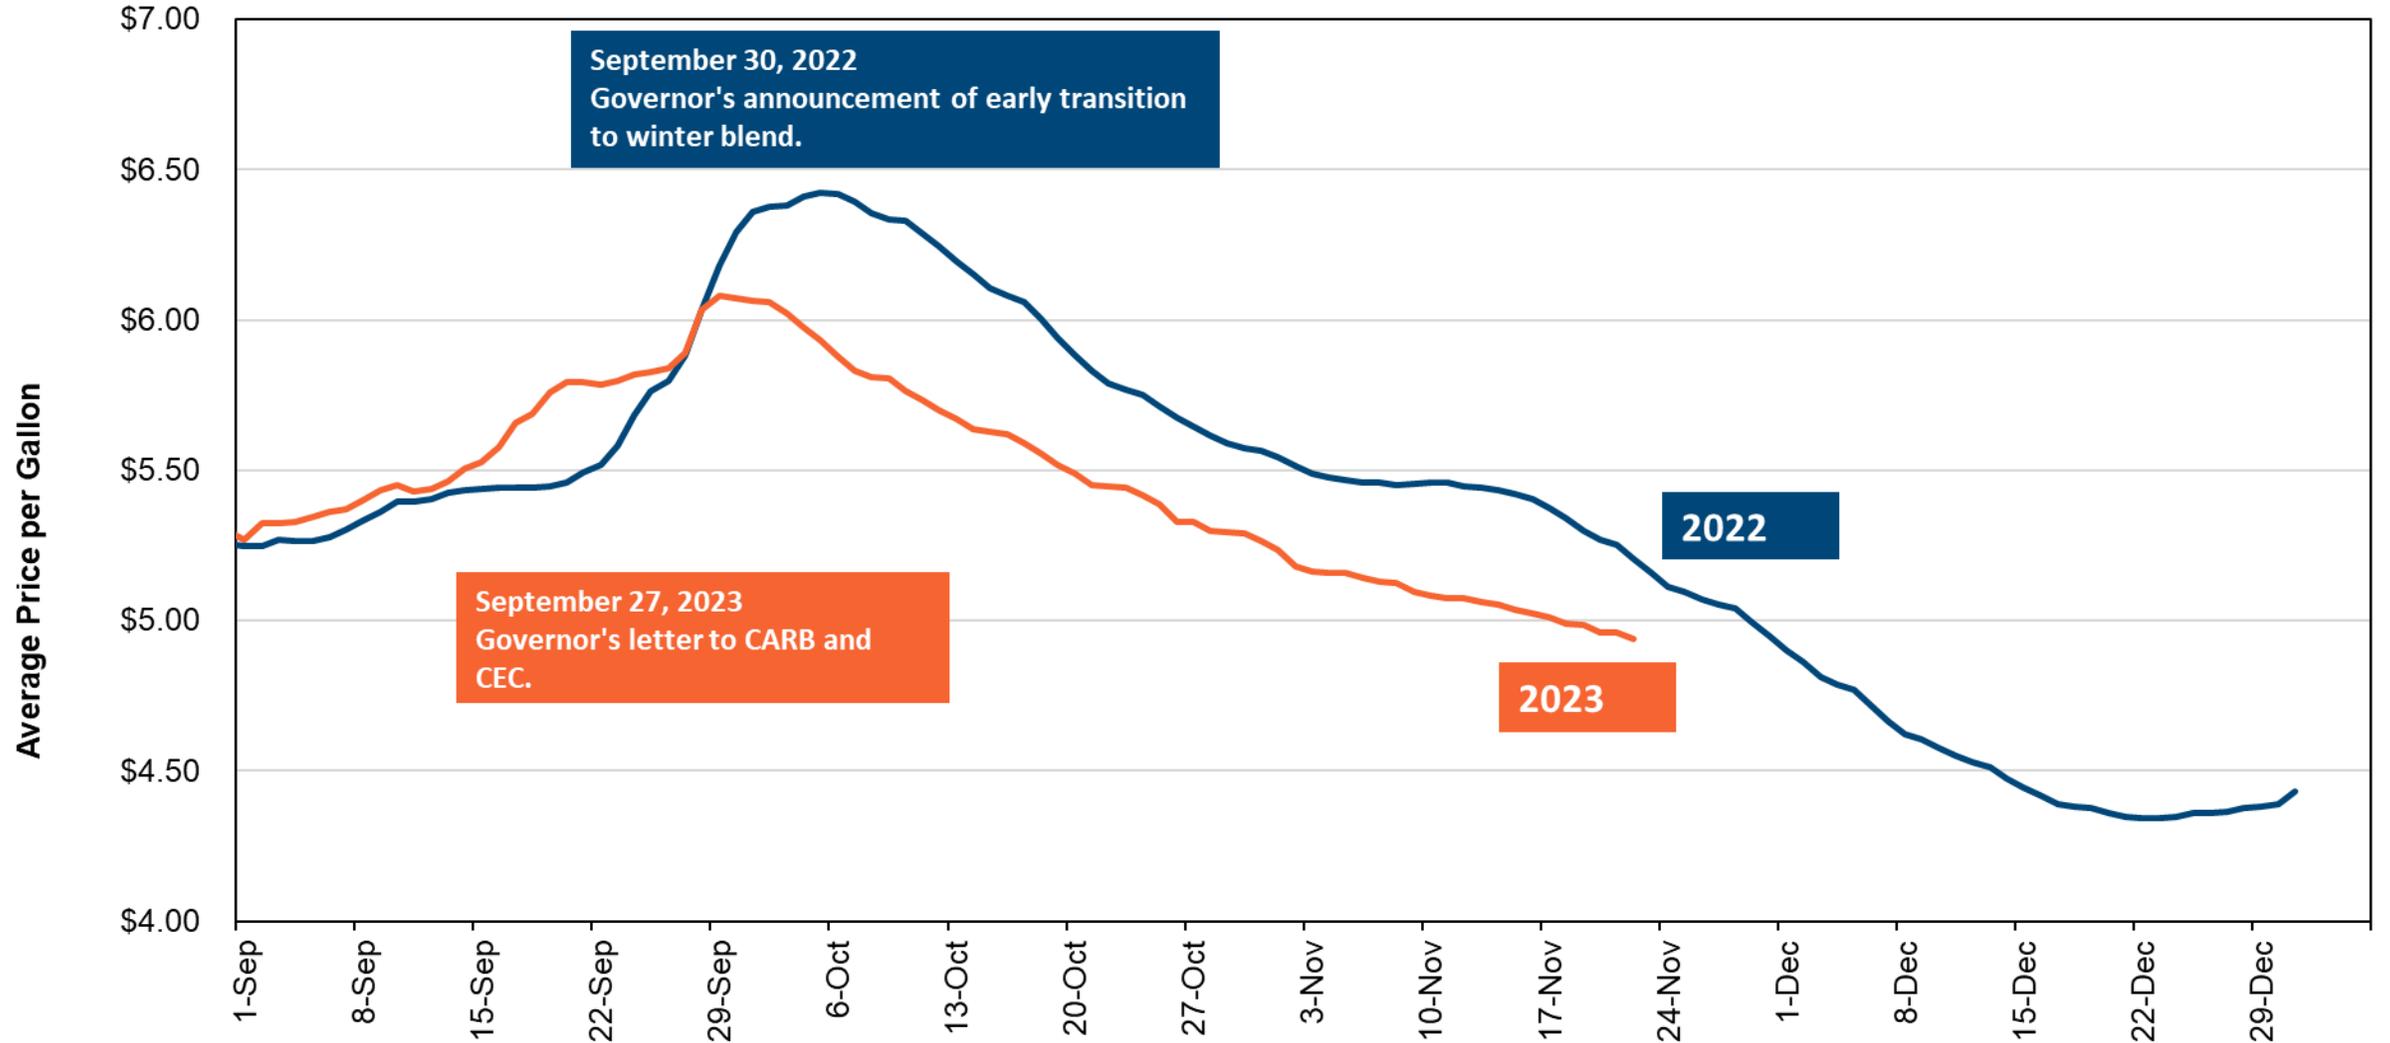

# Breakdown of California Gasoline Prices

Source: CEC analysis of OPIS, CDTFA, and Alaska Department of Revenue data

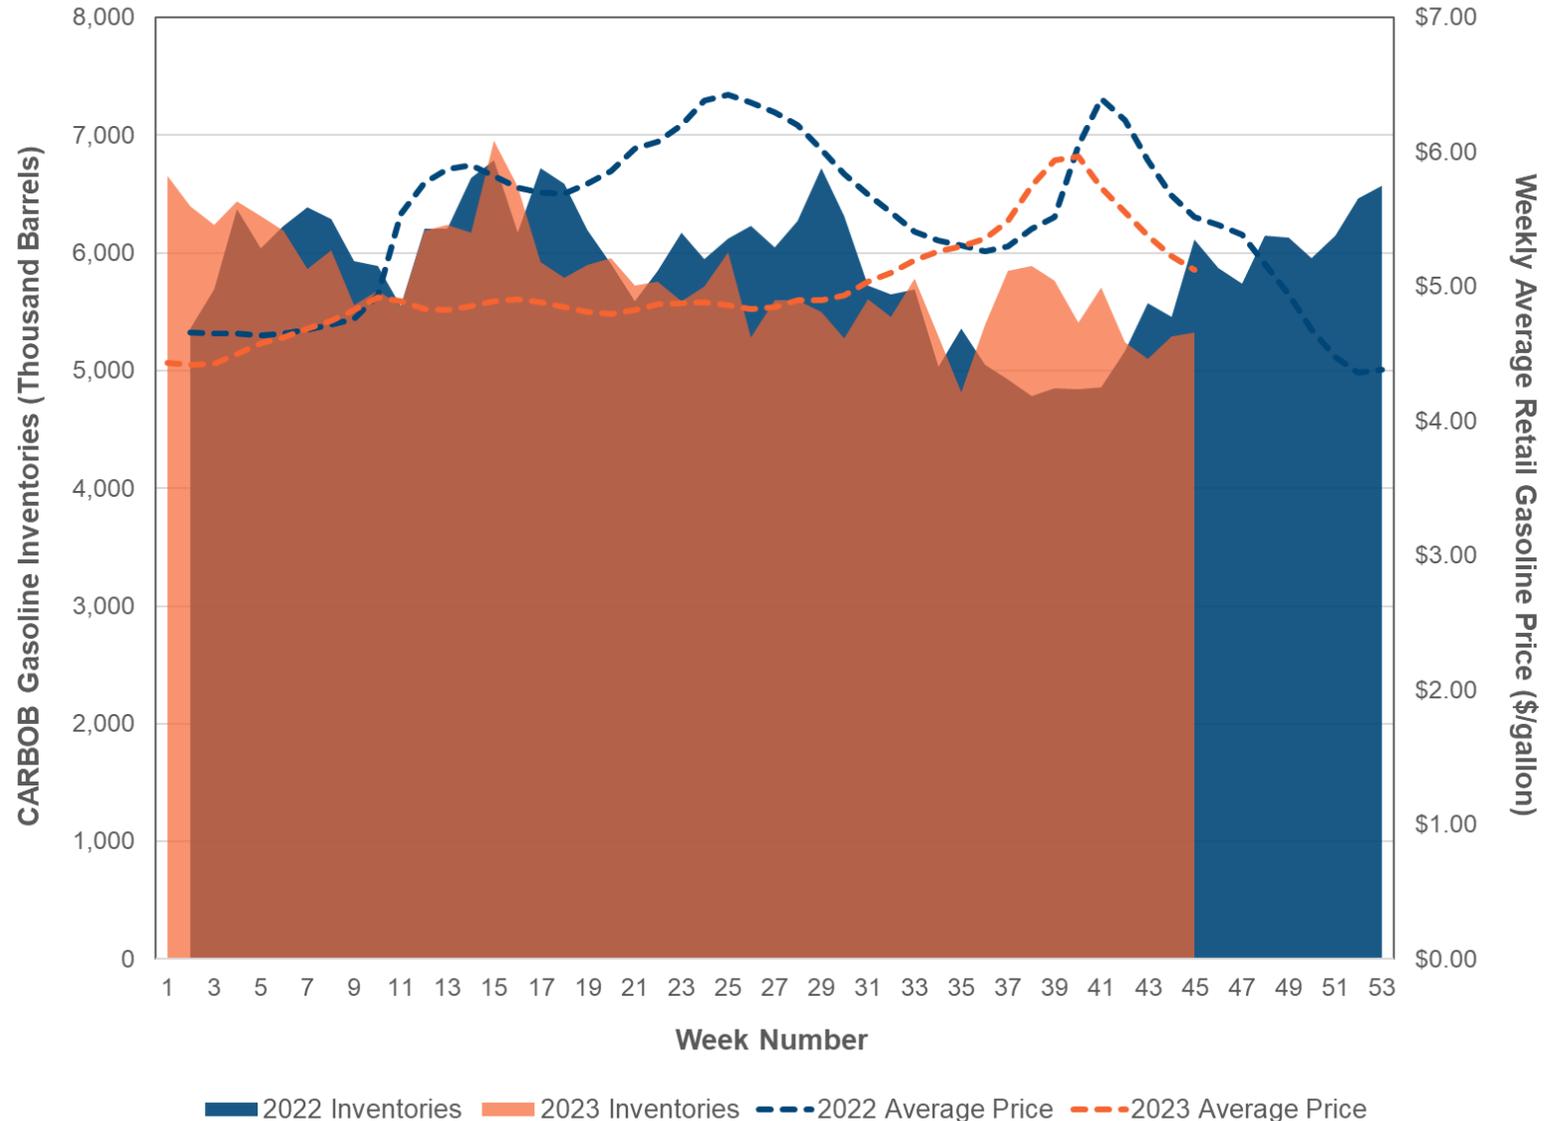

# California Retail Gasoline Prices

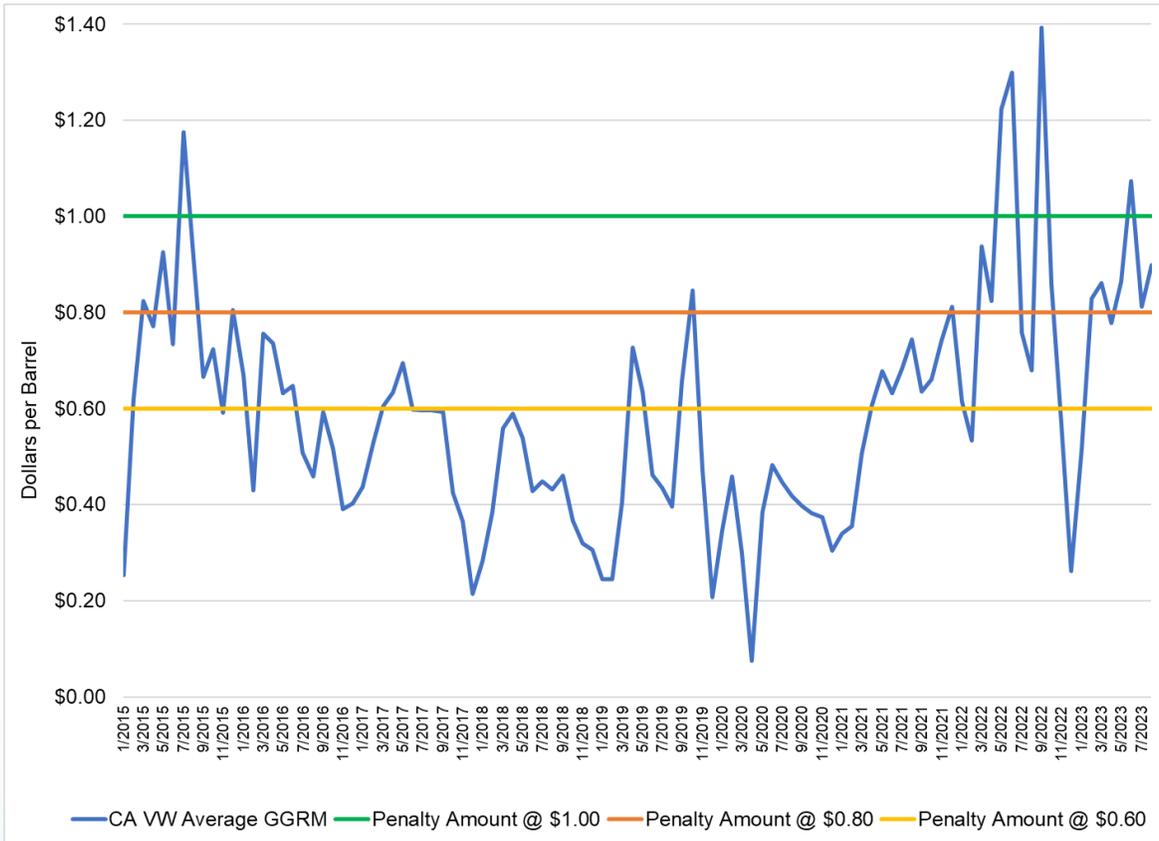

# What Causes Gasoline Price Spikes?

1. Gasoline demand increases during the summer.
2. Gasoline inventories drop over the summer.
3. Refiners do not consistently import additional CARBOB to maintain inventory levels.
4. Prices spike.

# Potential Margin Threshold (M1322 Data)

## Margin exceedances (2015 – 2023)

- **\$1.00 (5 occurrences)**  
Total revenue above max = \$1.2 billion
- **\$0.80 (18 occurrences)**  
Total revenue above max = \$3.1 billion
- **\$0.60 (46 occurrences)**  
Total revenue above max = \$9.5 billion

Source: CEC analysis of PRC 25355 data

$$\text{Total Revenue} = \text{Total Sales Volume (all channels)} \times (\text{Average Rack Price} - \text{LCFS \& Cap-at-the-Rack} - \text{Total Crude Acquisition Cost})$$

# Should CEC Establish a Margin/Penalty?

---

1. Do the benefits to consumers outweigh the costs?
2. What is the likely impact on gasoline supply?
3. What is the likely impact on the price at the pump?
4. What other factors should the CEC consider?

# Opening Remarks from the Dais

# **Presentation by Matt Zaragoza-Watkins**

# Comments from the Dais

# Roundtable Discussion

## Impacts and Benefits of Implementing a Max Margin and Penalty

**Moderator:** Ethan Elkind; Center for Law, Energy & the Environment

### **Participants:**

- Catherine Reheis-Boyd, Western States Petroleum Association
- Connie Cho, Asian Pacific Environmental Network
- Elena Krieger, PSE Healthy Energy
- Jamie Court, Consumer Watchdog
- Matthew Zaragoza-Watkins, Vanderbilt University
- Michael Smith, United Steelworkers

# Should CEC Establish a Margin/Penalty?

---

1. Do the benefits to consumers outweigh the costs?
2. What is the likely impact on gasoline supply?
3. What is the likely impact on the price at the pump?
4. What other factors should the CEC consider?

# Comments from the Dais

**Thank you.**

**Questions?**

**Submit comments to [Docket 23-OIIP-01](#) by 5:00 p.m. on  
December 12, 2023.**

# Public Comments

## Zoom:

- Use the “raise hand” feature.

## Telephone:

- Dial \*9 to raise your hand
- Dial \*6 to mute/unmute your phone line. You may also use the mute feature on your phone.

## Zoom/phone participants, when called upon:

- Your microphone will be opened.
- Unmute your line.
- State and spell your name for the record, and then begin speaking.

Limited to one representative per organization.

## Three-Minute Timer
