Need program Now

Please roll out this program now. Many people like me have failed systems and are waiting to sign contracts for home heating and air conditioning heat pumps. In the mean time people are going without. It can be miserable but we want to participate in helping to save the earth and its people with this decision that will have impacts for years and years. In addition contractors are also waiting for work. Get it done, please! Please! This is our second winter with a broken HVAC. The most important thing is the roll out schedule and making the qualifications low enough for the design criteria to be reachable for most homeowners. Just be careful so all companies can reach the requirements without a ridiculous price. Thank you.
