## **The Fountain Wind Project**

your system sucks just like this idea! These units are no recyclable, require maintenance with oils that we are trying to reduce in the name of the environment. Try killing more birds, invading our lands with these ugly units in our Tribal lands, interfere with firefighting and endangering our wildlife and our homes and people! Instead of forcing this this on us and wasting our tax dollars, try enhancing our power supply so we don't suffer power outages with mandates to buy EV that our power grid cannot handle! Our area doesn't want or need these waste of money. Try finding a real alternative that helps our power supply. Try building a few dams to hold water and generate electricity. Stop our Governors Newsoms mandates that we don't have power to support, and he has no real plan to fix it first. So go stick these in Newsoms back yard with his windy words. Not anywhere in California. Tell them remember the Green Deal and these failed at being recyclable. So NO to Wind Turbines!
