Wind mill project

If there is NO wind I can't run my house or charge my electric car. Not only is the preceding comment true but these wind farms(?) are an ugly visual situation. I resided in Palm Springs, CA in 1993 and you had to traverse the wind farm that is still present to this day. They are not beautiful and the word ugly doesn't do them justice. They are not producing enough electricity to run much of any thing. I would vote to not install a windfarm any where.
