Wind solar

My family and I have been living in the beautiful North State. We all value our environment and to tread on the Native American culture and build the wind turbines are offensive to the public and to a culture who have protected the environment for centuries. This is offensive to build this and to not protect OUR land. The money exchange and the effects of this is not of a long term value for my children and grandchildren. There are implications that have not been thought through and to be honest this is against all of the ordinances and laws that have been put into place. Please understand we value OUR state Our land and our environment. Please consider that the implications will be long lasting.
