Stop Fountain Wind Project

The planning commission and Board of Supervisors rejected this project, yet developers are attempting to circumvent these decisions. This is in an extreme fire danger zone, these towers will hamper and impede fire suppression as well as being unsightly and will have an impact on wildlife. The state PUC has granted yet another rate increase to PG&E so they can purchase electricity, so these towers will do nothing for residents of Shasta county. The blades of these turbines are also not environmentally friendly, as they cannot be recycled, and create more waste. I strongly oppose this move to nullify the wishes of the Planning Commission, the Board of Supervisors and the citizens of Shasta County.
