I am for the Fountain Wind Project

I believe we have to start thinking of sustainable ways of producing energy and that wind power is one that is viable for our whole country. We are going to see issues with water being able to generate energy in the future and some of the other ways are just not good for the planet. Wind power is free for us to use, we may pay for that energy but it is available and a resource for the future. I received a mailer to stop the project but I believe that it is for the good and a renewable source for the future.
