Stop Fountain Wind

Additional submitted attachment is included below.

Dear California Energy Commissioners,

I do not support The Fountain Wind Project or any other similar development of wind power generation in Shasta County. Many of the residents and most of the visitors who come here choose this place for the natural beauty of the mountains here in the north state. Most visitors are trying to leave behind industrial development for a few days. They want a quality outdoor experience. They do not come here to see a forest of industrial towers taller the buildings in San Francisco or Los Angeles. Industrial development of this kind is just not OK in this setting. Why?

They are a dangerous fire hazard.

They are an impediment to aerial firefighting because of their extreme height.

They destroy the natural beauty of the mountains by their presence.

They are offensive to the local First Nations tribes as proposed because they are so imposing and unnatural.

Please reject The Fountain Wind Project.

Mark McKinley
