Comment Against the Fountain Wind Project

A review of comments received shows that most Shasta County residents support the Board of Supervisors resolutions against this expensive project for many sound reasons including safety, biological and cultural impacts. and visual degradation to our beautiful landscapes.

The review of comments also reveals that the vast majority of positive comments come from contractors or employees that stand to gain economically from this project, directly or indirectly. It appears that the labor union has urged or required their members to submit comments in support of the project for their possible personal gain.

The majority of commenters against the project have altruistic motives. Very few negative commenters have anything to gain financially if the project does not happen. I urge the Commission to take these facts into account when considering comments from the public.

I am opposed to the Fountain Wind Project because of the many substantial negative impacts that have been well articulated in many of the public comments received. Thank You for respecting the Shasta County Board of Supervisors and the majority of county residents that are opposed to this project.
