Re: CEC docket 24-BSTD-01 – Quality Assurance within Sampled Groups

Dear Commissioner McAllister,

Additional comment as follow-up to the May 21st meeting with Commission Staff, CalCERTS, CHEERS, and industry stakeholders.

CHEERS supports the idea of requiring QA as 1% of associated lots for each developer, instead of associated lots tied to a specific tested lot of a rater. This would significantly increase the Provider's flexibility to collect QA information on sampled lots without delaying builders, trades, and raters.

We encourage staff to adopt 1% QA of associated lots for all developers with over 100 sampled lots.

Sincerely,

The CHEERS Team
