Battery Storage Facility

I want to express my fervent objection to building a lithium battery storage facility on the Saddleback Church property just below the bluff on which our Concord Hill community sits. The fire hazard or threat of fire hazard it represents a very real problem for us. Fire insurance rates are already getting out of hand (or are even becoming unavailable) and this facility will make that situation even worse. I absolutely object to this property being used in this fashion. Please consider using that property in a less-hazardous way that doesn't contribute to making our California dream unreal or unaffordable.
