## **Lithium Battery Storage next to residential neighborhoods should not be allowed**

Lithium Battery Storage next to residential neighborhoods should not be allowed

I currently live a little over a mile from the proposed site. The area is densely populated and sandwiched in between the 5 freeway and Golden Lantern, a major side street with 6 lanes of traffic.

Beyond being a densely populated area, the site itself has an abundance of brush, which often in the summer becomes dry and a significant fire hazard. In fact over the years, fire flare ups have occurred.

Adding a lithium battery storage site to this area is a recipe for disaster.

For the safety of the community, please deny the request to allow the lithium battery storage facility to built at the proposed site in San Juan Capistrano/ Laguna Niguel.

Thank you,

Janine Thomsen
