Lithium Battery Storage Facility Saddleback Church

As a resident of South Orange County since 1963 I vehemently oppose this "project" for many reasons.

First of all it would be unsafe, unsightly, and would ruin the beautiful hillside in this area. The air quality, hazardous materials, environmental issues ie ground soil and water table leakage, fire hazard etc being so close to homes and the freeway, the list goes on. Not to mention the dangers to our First Responders. This is not a good idea at all. A BIG NO FROM ME! My family, friends, neighbors and PETS do NOT want this in our area.

No. No. And NO!

By the way I will be voting out everyone on the Board that approves of this "project" Also the one proposed for the end of Pico in San Clemente. NO!
Good Day!
