Proposed Battery Energy Storage System Project (City of San Juan Capistrano)

This is not a project that should be near homes in either San Juan Capistrano or Laguna Niguel. I'm certain there is a better use for the land. The dangers that Lion batteries pose to the community are large, I live near this proposed area, and so do many elderly people in Senior Living Facilities. One failure can be devastating to the surrounding area. We have all seen Lion go off, the amount of energy released can be huge, and the resources needed to put it out are huge and lengthy. I will not vote in favor, not for those that vote for it. Have you seen a phone that has gone on fire??? have you seen a Tesla on fire?? How about a large Battery Storage facility??? Time to re-think this idea, n ow.
