## **Concerned and Disappointed**

As a Laguna Niguel resident that lives nearby the proposed site, I have legitimate concerns over public safety, including the severe fire threat posed by the battery energy storage facility. The site is already an area with significant fire threats, as demonstrated by the history of fires in a 5-mile radius of the location. Adding to the risk with potential for explosions and overheating at the facility, not to understate the added risk of toxic gasses or leaching into the land/water in the area, seems like a plan that prioritizes profits over the health & safety of taxpaying residents.

Commission, please fulfill your duty by rejecting the planned project. Compass and SDG&E can find a site better suited for their facility; a site that does not endanger so many California residents.
