Compass Energy Storage Project

My family and I strongly oppose the Compass Energy Storage Project in the City of San Juan Capistrano in an area that has an extreme fire risk danger and also puts several neighborhoods at great risk from fire and toxic fumes in the event of a fire. The proposed site also borders with a large creek that flows directly into the Pacific Ocean which would also endanger marine life in the event of a fire. In the event of a catastrophic incident our communities would also file a class action lawsuit against the California Energy Commission assuming this is permitted by the commission and has been forewarned of the risks. Again, I strongly oppose this project.
