Rebate Credit Eligibility, work in 2023

Let me echo Sandra Barton. The materials were quite specific that rebates would be available for work done in 2023. Like her and her family, we put out money early in the process, under the assurance that Acts Would Be Gotten Together. We are willing to pay our fair share " and even a bit more " to help California and the nation meet climate goals. But the PROMISE was that there would be rebates. It's increasingly appalling that this has taken so long. We don't even need the money right away|but it would be nice to be able to get in line and have our claims vetted.
