concern regarding proposed energy storage facility

As a resident of Laguna Niguel I am concerned about potential safety and fire risk to our city which is adjacent to the proposed storage facility. The area for proposed use is designated for preservation of natural landscape and animals and prone to wildfires because of the dry vegetation. If there were a fire in this hillside area that damaged the battery storage facility, the toxic effect would bring detrimental health harms to both human and animal life in the area.

I oppose the use of this area for a lithium battery storage facility.
