Heera 1 vs 2

I urge you to make phase 1 rebates for induction stoves (and those with batteries) and heat pump dryers (and hybrid heat pump dryers) available to single family residences.

Given that phase 1 won't start until fall, 2024, it seems likely that phase 2 will not start until after January 20, 2025. If that happens, and the GOP take over Congress and/or the presidency on that date, it is HIGHLY likely that all this work creating the program will be for naught (thrown out the window), either in court or by presidential edict. The current GOP platform and rhetoric are contrary to the program. Money not spent by then would be curtailed.

I urge you to begin phase 1 and 2 ASAP.
