Battery energy storage system (BESS) in the City of San Juan Capistrano

Hello, I want to inform you that I am EXTREMELY AGAINST this. I live very close to this area and this would affect my family, myself and my home etc etc. The location is not appropriate for this. This should be in desert far away from homes, businesses, the 5 freeway, the ocean, historical church and town in San Juan Capistrano and a passenger train. The train and a creek run right behind there. And what about the animals and birds etc. How would the fireman get there since its a difficult entry. What happens to our health breathing in these toxic fumes when it will have to burn for a week. Also, what happens when the hills next to it catch fire etc. What will happen to my house insurance....it doubled this year....wait until the insurance companies hear about this. PLEASE STOP this craziness. If you allow this to happen it will affect thousands of people in so many ways especially their health. Is the 5 freeway going to stop for days when the fire breaks out. We all know that a fire will start sooner or later.....just a few days ago there was another in Santa Ana....a little while ago in San Diego.....there recently been 38 fires. Please.....this does not belong in this area and I hope to GOD that you all see it. Thank you for your time.
