Opposition to BESS in San Juan Capistrano

Lithium Ion batteries are incredibly dangerous in general; my husband is in the technology/battery industry and the complexities and dangers of battery storage are vastly underestimated. We had a nearby freeway closure a few days ago (closure remains) due to said batteries catching fire after a semi truck hauling them overturned. The risk of larger fire, explosion, and hazardous materials is scary and important. As it is, our homeowners insurance is in jeopardy due to wildfires. The State of CA is in the midst of an insurance crisis with carriers pulling out of the state and refusing to cover. This proposed BESS project will exponentially increase fire danger and make coverage next to impossible. The site is less than 5 miles from our home, putting us at risk financially (no insurance, reduced home values), physically (fire and hazardous materials), and emotionally (fear/industry knowledge). We are categorically OPPOSED to this project and will vote accordingly whenever the opportunity presents itself on this project or any state ballot.
