## **Battery energy storage facility in San Juan Capistrano**

This is my opposing vote to this project. The proposed facility is too close to homes and a major freeway, the I-5.

Due to the relatively new issue of lithium batteries, not enough is known to ensure that radiation or toxic waste will not affect homes and families that are close to the facility.

An explosion or fire could have dire consequences not only for homes in the area but also could affect traffic on surrounding roads and the I-5.
